

CERTIFICATE OF SUITABILITY FOR TEMPORARY FOOD CONTACT

Product

Tata Steel reference: Advantica SDP50 MXW294

IanESCO test's results

The inertia of the coating coming into temporary contact with food has been assessed by a test of complete migration.

Migration has been measured in simulator liquids representing aqueous, fatty, acid free and non-alcoholic food. Under the test conditions, the total migration of the paint respects the limits set by the legislation

Conclusion

The coating is suitable for temporary contact with aqueous and fatty according to the IanESCO test described here above.

Date: 19/05/2017

Audrey hernandez
Lab Manager

A handwritten signature in black ink, appearing to read 'Audrey Hernandez', is written over a faint circular stamp.
